NodeJS

Relevant Work Experience

Product Designer at Uplift Health Club.

8 Months

Apr 21 – Present

- Designing a doctor e-consultation platform.

UX Designer at Complemar Inc.

3 Years 4 months

Oct 17 – Jan 21

- Lead and managed software development team** through multiple product intervals (PI) in an agile environment.
- Collaborate with stakeholders towards breaking down features to **drive desirability, feasibility and viability**.
- Initiated and launched multiple features to support high volume order fulfillment.
- Designed dashboards for multiple roles to facilitate a **high throughput** by adopting the four stage assessment process (detection, recognition, identification and comprehension).
- Support developer team by **translating business concepts and process** workflows into user/task flows, wireframes, and mockups to ensure a consistent design with an intuitive user experience.
- Designed** and developed a **Design System** consisting of brand guidelines and a **VUE UI component library**.
- Host UX workshops** and design sessions to discuss different UX topics and educate our software team towards making better decisions.

UX/UI Researcher at Center on Access Technology (CAT) lab (RIT)

9 Months

Nov 16 – June 17

- Designed and developed hardware, software and prototype models for a **wearable device** for people who are deaf and hard of hearing.
- Managed usability testing, defined testing parameters, prepared prototypes, facilitated tests and reported results for the wearable device.

Education
